MATERIALS & CUSTOMISATION

CHOOSE THE FABRIC FOR THE JOB.

Fabric is selected around presentation, comfort, durability, care and the working environment.

COTTON

Soft and breathable

Corporate tees and casual uniforms

POLY-COTTON

Balanced comfort and easy care

Everyday shirts and workwear

POLYESTER

Durable and colourfast options

Polos, sportswear and sublimation

TWILL

Structured and hard-wearing

Trousers, jackets and coveralls

RIPSTOP

Reinforced woven construction

Selected tactical and workwear

PERFORMANCE KNITS

Moisture-management options

Active and outdoor teams

FLEECE

Warm and comfortable

Jackets and cool-weather layers

SPECIALIST FABRICS

Hazard-led performance

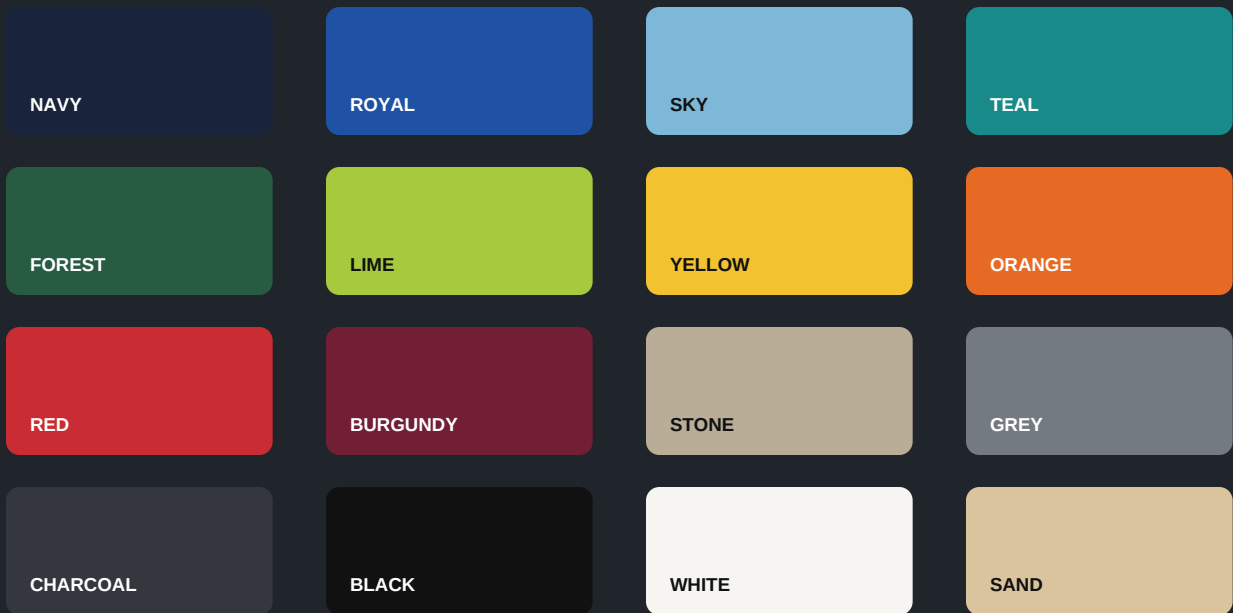

Protective clothing by specification

Composition, weight, finish, performance and certification are confirmed against the selected product and supplier specification.

COLOUR PLANNING

COLOUR THAT WORKS AS A SYSTEM.

Build a coordinated palette across roles, garment types and branding applications.

STANDARD COLOURS

Fastest route where stocked colours suit the brief.

COORDINATED PALETTES

Use primary, secondary and accent colours by role.

CUSTOM COLOUR

Subject to fabric, quantity, supplier capability and approval.

Screen colours are illustrative. Final shade approval uses the applicable physical reference or sample.

BRANDING METHODS

MATCH THE METHOD TO THE OUTCOME.

EMBROIDERY

Best with simplified, stitch-ready artwork

BEST FOR

Polos, shirts, caps and jackets

ADVANTAGE

Premium texture and durability

SCREEN PRINT

Economical setup improves with quantity

BEST FOR

T-shirts and suitable bulk garments

ADVANTAGE

Bold, efficient colour application

HEAT TRANSFER

Finish depends on film, fabric and care

BEST FOR

Names, numbers and detailed logos

ADVANTAGE

Flexible short-run personalisation

SUBLIMATION

Not suited to cotton or dark base fabric

BEST FOR

Compatible light polyester products

ADVANTAGE

Full-colour, all-over design potential

Artwork review, colour proofing and wash-care requirements are confirmed before production.

SUBLIMATION

FULL COLOUR. BUILT INTO THE FABRIC.

Heat converts the printed dye into gas so it bonds with compatible polyester fibres.

01

ARTWORK

Design is prepared to the garment template.

02

COLOUR PROOF

Artwork and colour expectations are reviewed.

03

TRANSFER PRINT

The design is printed onto transfer paper.

04

HEAT PRESS

Controlled heat transfers the dye into the fabric.

05

CUT & ASSEMBLE

Printed panels are cut and stitched as specified.

06

FINAL CHECK

Placement, finish and approved details are reviewed.

IMPORTANT Sublimation works best on compatible light-coloured polyester.

Exact colour appearance can vary with fabric, finish, lighting and screen display; approval should use the applicable proof or sample.

HOW WE MAKE IT

FROM BRIEF TO DELIVERY.

01

BRIEF

Role, quantity and use

02

FABRIC & TRIMS

Options selected for the brief

03

PATTERN & SIZING

Fit and size range aligned

04

CUTTING

Components prepared

05

STITCHING

Garments assembled

06

BRANDING

Approved identity applied

07

QC & PACKING

Order checked and packed

The exact production route is confirmed according to the selected product and supplier.

CONSTRUCTION DETAILS

STITCHING THAT SUITS THE JOB.

SINGLE-NEEDLE

Clean assembly and topstitching

DOUBLE-NEEDLE

Parallel reinforcement and finishing

OVERLOCK

Neat, secured fabric edges

BARTACK

Focused strength at stress points

REINFORCED SEAMS

Extra support where required

HEM & EDGE FINISH

A clean, durable final edge

Construction methods are selected by product, fabric, application and approved specification.

QUALITY CONTROL

CHECKED BEFORE IT REACHES YOU.

SPECIFICATION FIRST

**Quality starts with
a clear approved brief.**

Checks are aligned with the selected product, agreed sample and order requirements.

01

APPROVED SAMPLE

Reference for the confirmed order

02

MEASUREMENTS

Key points checked against specification

03

SEAMS & STITCHING

Construction and finish reviewed

04

BRANDING

Position, artwork and appearance checked

05

TRIMS & CLOSURES

Applicable components reviewed

06

COUNT & PACKING

Quantity, sizes and packing confirmed

Inspection scope varies by product and order.

CUSTOM BRANDING

YOUR IDENTITY, APPLIED WELL.

The right method depends on the garment, artwork, intended use and quantity.

EMBROIDERY

A durable, premium finish for polos, shirts, caps and jackets.

SCREEN PRINT

Efficient for bold artwork and suitable bulk garment orders.

HEAT TRANSFER

Useful for names, numbers and detailed multicolour graphics.

SUBLIMATION

Full-colour artwork integrated into compatible polyester fabric.
